TRAVELING CHECKLIST

- Make sure loose items are properly stowed.
- Doors and drawers are shut properly, and door catches are activated.
- Grey/black and fresh water tank is emptied.
- If in freezing temperatures, trailer must be winterized properly.
- All 12 volt appliances or lights are off to extend the life and charge of battery/batteries.
- Always check battery level(s) before transportation to ensure proper use of appliances/lights when destination is reached.
- Check LP levels to ensure ample supply to last your trip.
- If your trailer is equipped with a folding bunk bed, make sure bunk bed is in the 45 degree angle setting for traveling. If not in that position when traveling, damage to the bunk or components may occur.
- If your trailer is equipped with a bed lift it must be in the stored position (all the way up) when traveling. Failure to do so will result in damage to the interior.
